**DETAILED ACTION**

***Election/Restrictions***

Applicant's arguments with respect to the restriction requirement are determined to be persuasive; the restriction between claims 45 and 46 is hereby withdrawn.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 45-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Torek et al ('951).

Torek teaches the following claimed limitations as cited below:

45. (Currently Amended) An semiconductor device comprising:  
an ammonia-cleaned, an opening provided in an insulating layer, said opening being formed over a polysilicon region and a bottom of said opening being substantially free of polymer residue and silicon rich oxide residue (Col.5, lines: 15-26 and Fig.2 (26)); and  
a conductor within said opening, said conductor being electrically connected with said polysilicon region (Fig.3 (22)).

Art Unit: 2813

46. (Currently Amended) An integrated circuit comprising:

an ammonia-cleaned, High Aspect Ratio opening provided in an insulating layer, said opening being formed over a polysilicon region and a bottom of said opening being substantially free of polymer residue and silicon rich oxide residue (Col.5, lines: 15-26 and Fig.2 (26)); and a conductor within said opening, said conductor being electrically connected with said polysilicon region (Fig.3 (22)).

47. (Previously Presented) An integrated circuit as in claim 46 further comprising a silicide layer between said conductor and said polysilicon region (Fig.4 (34)).

48. (Original) An integrated circuit as in claim 46, wherein said integrated circuit is a memory circuit (Col.1, lines: 15-20).

49. An integrated circuit as in claim 47 wherein the interface area between said conductor and polysilicon region is free of oxygen contamination (Col.5, lines: 1-10).

### ***Response to Arguments***

Applicant's arguments with respect to claims 45-49 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
